

Please Join the Families Connect Project

The Elderly Care Research Center at Case Western Reserve University is recruiting grandparents and parents of children with Autism (ASD) ages 3 to 16 years old. Eva Kahana PhD and Elizabeth Short PhD are co-investigators of this project. Families Connect is to help family members with finding creative ways to advocate for their children with Autism. We do this by training both the parent and grandparent on how to build strong alliances and advocacy skills for their children with autism spectrum disorder (ASD).

DATE: Tuesday, Oct 17th, and Tuesday, Oct 31st.

Time: 6:30 pm

Refreshments served and free parking

The project involves:

- Participation in one 60 to 90-minute educational session
- Resource materials to take home related to ASD
- Opportunities to share your opinions and experiences caring for a child with ASD
- Completion of two surveys
- A \$20 gift card for completing each survey (\$40 total)

**If interested in participating, please contact
Timothy Goler, Project Director at 216-355-9219
Or email tdg33@case.edu**
